

## WHITE BEACH

The main attraction of White Beach is of course its beauty but also that you have everything you need there: hotels, restaurants, nightlife, activities, it's all available right in front of the beach. It's a very good place for swimming as well, since the water is usually flat, has no current and becomes deep slowly. During morning and noon times the beach is relatively quiet. These are good times to go out if you like to have the beach more to yourself.

In the afternoon more people start to come to the beach and you'll see locals and tourists alike starting to play sports. Volleyball is by far the most popular beach-sport on Boracay, but soccer is played as well (mostly in Station 1 since the beach is wider there). The sun sets around 6:00 pm all year round. It's the busiest time on the beach with lots of people taking pictures and enjoying the view. In the evening the beach path gets busy with a lot of people visiting restaurants. Then at around 9-10 the nightlife kicks in and the bars become busy. Around midnight the bars quickly become quiet again as most people move from the bars to the clubs. The beach has 2 parts that run parallel to each other: "the path" and the beach itself. The path runs along the buildings that sit in front of the beach and is separated from the beach itself by palm trees.
